Week 8 (Plan) (Scrum master: Nathan Schneider)

[Meetings]

4/2 Discuss work distribution for the week and make sure everyone is on track

4/4 Discuss progress from the week and work on the project together to finish some of the user stories for the week. Ensure that each member is able to run the code locally and that everything works.

[Individual Goals]

Nathan: Research machine learning algorithm and making it more efficient

Peter: Implement selection options for editing and sharing capsules.

Kevin: Work on collecting data for machine learning project and exporting the model

Evan: Implement playing the users top spotify song on their phone when they receive their capsule
