Week 9 (Plan) (Scrum master: Nathan Schneider)
[Meetings]
4/16 Discuss work distribution for the week and make sure everyone is on track. Test the entire project as a group and make sure all required functionality is implemented
4/18 Discuss progress from the week and work on the project together to finish some of the user stories for the week. Prepare for the final presentation

[Individual Goals]
Nathan: Research machine learning algorithm and making it more efficient. Finalize all navigation
Peter: Finish capsule sharing and work on styling.
Kevin: Label images and create feature vector from training data, import model into project
Evan: Finish spotify api functionality and work on styling
